

Magnitube™

Majestic Columns

A brand owned and manufactured by Iconic Columns & Structures Pty Ltd

Welcome

Magnitube™ captures the energy of concrete and transmutes its force into majestic columns.

I know that shape and form reveal hidden order and convey the meanings of strength, majesty and legacy.

This notion has been the force in immersing myself in the study of universal law and sacred geometry, reflected in the ethos that underpins the products I create.

The **Magnitube™** range of products was born..

So I welcome you, the creator, the architect, the builder to partner with us for creativity and success. To join forces to bring forth your legacy and to create iconic projects with eminence and power.

Kaitlyn

Magnitube™

Majestic Columns

Magnitube™ is the next generation of column forms.

We are introducing sophisticated capabilities to the market with our LUX™ and One™ range of columns that span the spectrum of Class 1

Technology that offers new refinement in finish classes, mega dimensions & extraordinary efficiencies

Innovation/R&D have borne the Lux™ and One™ ranges which reflect the intricate architectural demands of the industry

Advanced Manufacturing combined with ISO9001 certification that underpins the products we produce to the highest standards

Magnum Manufacturing

Advanced manufacturing techniques & ISO9001 certification underpin the products we create, everytime. Align with us to elevate your project

Majestic Finish

Futuristic technologies that bring to the market our Lux™ and One™ range of columns that span the Class 1 specification spectrum. Eliminates patching. Our majestic finishes are in a league of their own.

Mega Dimensions

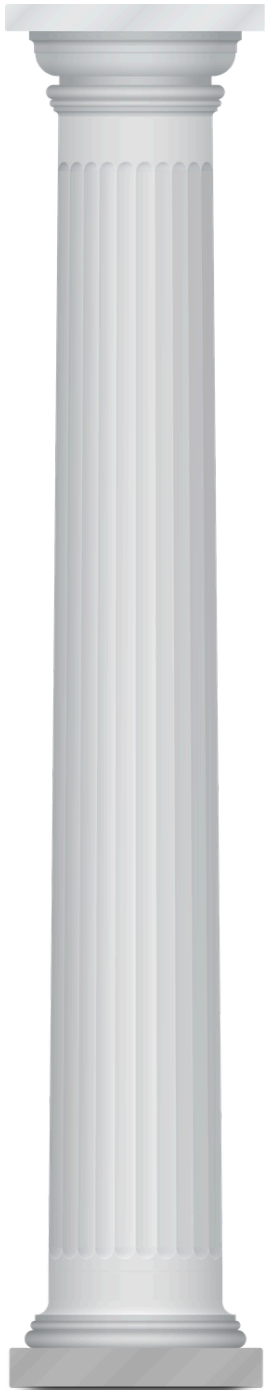

The Mega range manufactures diametres from 2000 - 4000mm with any height. The scope and possibility is unlimited with our Mega range of products.

Magnitube™ Mastery

NEW
Capabilities

Power Pour

Magnitube's advanced engineering capabilities allow for an unrestricted pour rate
Accelerate your construction timeline by aligning with our efficiencies

Profiles

Specific to our core industries of construction, foundations, energy & infrastructure. We have a range of profiles that add enhanced efficiencies and capabilities

6mm Standard
12mm HD
21mm Mega Mini
29mm Mega Medio
34mm Mega Maxi

PVC Performance

Magnitube is 100% waterproof
100% Submersible for insitu water applications
Greenstar rated and 100% recyclable

Magnitude Lux™

Magnitude Lux™ is the HIGHEST Class 1 Finish

Our clients have a sophisticated eye and require the highest level of finish that concrete can achieve. Recognising this, we have developed LUX™ - our ultra luxury range of column forms that are quite simply in a league of their own.

Lux™ creates a finish that is luminous and seamless

Elegant refined sophistication in a ready to pour column form ranging from 300mm - 4000mm diameter, any height.

Going beyond the architectural grade of **Class 1** has been very elusive to achieve. There is an acute degree of difficulty and manufacturing complexity required to create these forms, which our craftsmanship reflects.

Class 1 Finish is a seamless appearance in architectural concrete design which is crucial for creating visually appealing and well designed spaces. It evokes a sense of order & sophistication,

LEGACY

“

A Class 1 finish requires Class 1 forms. Our Lux™ and One™ columns achieve the ultimate, most intricate and demanding finish.

Class 1

Span the Spectrum of Class 1 - AS3610

Magnitube™ Class 1 Finish Standards

Lux™

Luxurious Finish

Magnitube Lux™ is the **HIGHEST** Class 1 Finish creating a luminous and seamless concrete surface. Best utilised for ultra Luxury range columns, statement foyers and monumental structures.

One™

Class 1 Finish

Magnitube One™ meets Class 1 specification. Best utilised for an architectural look and also demanded for main roads Bridge work. The One™ enables the client to elevate the look of the concrete column.

Lux™ and One™ Class 1 Standards

Eliminates patching
No Hydration or discolouration stains
Waterproof Internal skin
High Stress Load Tolerance
No deflections

N:B Class 1 off form finish as defined by AS3610

Magnitube One™

Magnitube One™ is our evolution of internal coatings. Eponymously named after the Class 1 finish that it achieves.

The One™ feature leaves a Class 1 Finish on the concrete surface. Best utilised for an architectural look and also demanded for main roads Bridge work, the One™ feature enables the client to elevate the look of the concrete column.

An internal skin creates a barrier between the column form wall and the concrete, creating a seamless concrete surface. Our Magnitube One™ column has no vertical seams and produces a ready to use class 1 finish on the market.

Diameter range 300mm - 4000mm

Magnitube™

Magnitube™ is our standard finish column

Magnitube™ creates a Class 3 surface finish on the cured concrete.

A spiral marking remains on the concrete surface which we refer to as Self Finish.

Magnitube™ is best utilized for repetitive levels and for columns that will have decorative finish applied by secondary after trades.

Available in diameter range 300mm - 4000mm
